

**The fun frequency ignites within her like fire, then ripples through her being like water in self - replicating effervescent bubbles.**

### Who is Funtasia?

Funtasia is the Dakini of fun. She represents the fun frequency which bubbles up spontaneously. She resides in the eternal Palace of Fun and can appear without warning any time, any place and lighten things up. She carries the humorous sentiment that can be the saving grace in many situations, even the dire and tragic. Her main mission is to stop people from taking themselves too seriously.

The jesters in courts of old were there not just to entertain the rulers, but to help alleviate the tension a person holding such responsibility would naturally experience. By bringing humor to the topics of the day, if the jester is doing his or her job well, the relaxation this provides allows room for the issue to breathe and the ruler may well be able to view things from a fresh and more expansive perspective.

Funtasia represents the positive approach to life.

## Nature & Description of Dakini

Her realm is a cartoon world of fun and fantasy. Lots of rides and fun, fun, fun. See her in a champagne glass of bubbles, dissolving into bubbles of laughter and sheer joy.

Her Palace of Fun is a wild amusement park. She likes to drink champagne and giggles and girlish laughter are an essential part of her soundscape. She will make you laugh. She is very sassy. She morphs in and out of cartoon and 'real' versions of herself. Sometimes she is composed entirely of bubbles, constantly rising and popping as she giggles and laughs. She exists in the effervescence of life. Her laughter is very infectious.

She chooses to see the funny side of things, she can make fun of herself and she can promote laughter and lightness at any time.

She has spontaneously created rides and funfair attractions in her realm, crafted from her own being.

She colors herself with day glow candy colors. She is childlike. She is a turn on. She is life positive. She is sexy, for the humorous sentiment is next to the erotic. If sex wasn't fun, the whole race would die out.

She is here to show how to have fun with yourself. She is the expression of the inner font of imagination, which is a boundless source of ever-flowing fun potential.

At the base, the center, a DNA spiral arises from an illuminated carousel - a manifestation of Funtasia's shakti (female power) - and becomes an ever bubbling champagne cocktail of sheer 'joie de vivre'.

To the left, she invites you to take her various rides - from the Alice-like adventure into the looking glass hall of mirrors she has in the Wonderland inside herself, to the wild adventure of her roller coasters and big dippers. She is busy taking all her own rides and enjoying every moment...

To the right is Funtasia's merry go round. She takes the forms of all the rides herself, and appears as a clown in the center. This becomes the carnival hat of Funtasia, who offers you a cotton candy cupcake.

We see her beyond as a 'Helter Skelter' spiral ride.

Funtasia turns reality on its head with a wink and a smile.

P.S. Funtasia says you have a free pass to her Palace of Fun and you can come and play with her there any time you like...

6. If things get a little grim, evoke the fun frequency you've been cultivating and just send it as a big bundle of fun to encircle the heaviness with lightness and joy. Funtasia says, 'Please try it. If lots of us 'Funnies' get together, who knows what could happen?'
